## **10. Risk Disclaimer**

Trading and investing in financial instruments such as securities, forex, stock markets, commodities, Contracts for Difference (CFDs), options and futures involves significant risk. These markets can be volatile, and the value of your investments may fluctuate, resulting in substantial losses, including losses exceeding your principal amount.

Leverage, particularly in CFDs, forex and futures, can magnify both potential gains and losses. There is a risk of losing more than your initial investment, and margin calls may require additional funds to maintain your positions.

You should carefully consider your financial situation, risk tolerance and investment objectives before engaging in trading activities. It is essential that you fully understand the risks involved in these complex financial instruments.

We recommend seeking independent financial advice before engaging in these activities. By participating, you acknowledge that you understand the risks involved and accept full responsibility for any losses incurred, which may exceed your principal amount.
